Call for Papers

The De Vinci Research Center (DVRC) and the De Vinci Immersive Lab are pleased to announce the De Vinci Immersive technologies and Vision Engineering Research Workshop (DIVE'25), a one-day interdisciplinary event uniting engineering, digital and design, and social sciences researchers to present ongoing and original research on immersive technologies, computer vision, and human-technology interaction across various fields.

This event aims to showcase our expertise in immersive learning, AI-driven environments, digital twins, and extended reality while fostering interdisciplinary collaboration. We invite research presentations exploring emerging challenges, innovative solutions, and the evolving role of immersive technologies in VR/AR, XR, human-technology interaction, computer vision, and digital transformation.

- **Date:** June 5th, 2025
- **Deadline for submission:** May, 15th, 2025
- **Notification of acceptance:** May 23rd, 2025
- **Location :** Pôle Universitaire Léonard de Vinci, Paris, France
- **Organized by:** De Vinci Research Center (DVRC) & De Vinci Immersive Lab

We invite **already published, recent, ongoing, and early-stage** research from faculty, PhD candidates, students in the Research Track, and postdoctoral researchers.

We also **invite students and young researchers to submit posters** showcasing their research projects, providing an opportunity to share their work, receive feedback, and engage with the academic community.

Participating in this event provides a valuable opportunity to showcase research in a collaborative and interdisciplinary setting, engage with peers from De Vinci Higher Education, and beyond, and gain insights into the latest advancements in immersive technologies and AI-driven vision. It also fosters meaningful discussions and potential collaborations with both academic and industry partners, while offering selected presenters the chance to further develop their research for publication opportunities.

Topics of Interest (but not limited to):

Extended Reality & Digital Environments

- Mixed Reality (MR) and Diminished Reality (DR) applications
- User experience (UX) and human-computer interaction in immersive spaces
- Immersion, presence, and engagement in digital worlds
- Ethical and societal implications of immersive media

Intelligent Vision & Human-Technology Interaction

- AI-driven object and action recognition
- Emotion detection, gesture tracking, and sentiment analysis
- AI-powered avatars and virtual assistants in professional and educational settings
- AI-powered Human-Robot interactions in industrial and education settings

Immersive Learning & Pedagogical Innovation

- Virtual Reality (VR) & Augmented Reality (AR) in education
- Gamification and serious games in immersive training
- Cognitive and behavioral effects of immersive environments on learners
- AI-powered adaptive learning in immersive settings

Digital Twins & Smart Environments

- Real-time simulation and predictive modeling in industry
- Applications in healthcare, urban planning, and smart cities
- AI-driven analytics for digital twin optimization

Submission Guidelines

We welcome **extended abstracts (or short papers)** presenting already published, recent, original, or ongoing research, theoretical insights, or practical case studies. Submissions should clearly define the research question, outline the methodology, present preliminary findings (if applicable), and highlight the expected contributions.

Submissions should adhere to the Lecture Notes in Computer Science (LNCS) guidelines provided by Springer ([LNCS Author Guidelines](#)), and should be organized as follows: **Abstract, Introduction, Literature Review, Methodology, Findings, Discussion, and Conclusion** to ensure clarity and coherence.

- **Format:** PDF, max 6 pages (including figures and references)
- **Language:** English
- **Submission link:** <https://forms.gle/88eVtFGQktE7iijB7>

We also welcome young researchers' **posters**. They should be of **A1 format**.

For inquiries, please contact: Ahmed AZOUGH ahmed.azough@devinci.fr and Insaf KHELLADI insaf.khelladi@devinci.fr

We look forward to your contributions and to fostering a dynamic discussion on the future of immersive technologies!
